Attendance & Departure System

User Manual

For employees, line managers, HR and system admins

Version 1.0 — 2026-10-28

Contents

1. Introduction and roles
2. Getting started
3. Employees: checking in and out
4. Line managers
5. HR
6. System admin
7. Attendance statuses
8. Frequently asked questions

1. Introduction and roles

This manual explains how to use the Attendance & Departure System day to day. Read chapter 2 first, then the chapter for your role.

Role	Sees	Can do	Chapter
Employee	Only their own data	Check in and out; view their own record	3
Line manager	Their team (employees whose direct manager they are)	Dashboard, reports and GPS maps for the team; record leaves and missions for the team	4
HR	All employees	Employees, shifts, locations, departments, leaves, editing attendance records, reports, user accounts for managers and employees	5
System admin	Everything	Everything HR can do, plus settings, backups, the audit log and admin/HR accounts	6

2. Getting started

Sign in

1. Open the system address you received (or the app icon on your phone's home screen).
2. Enter your **Username** and **Password** and tap **Sign in**.

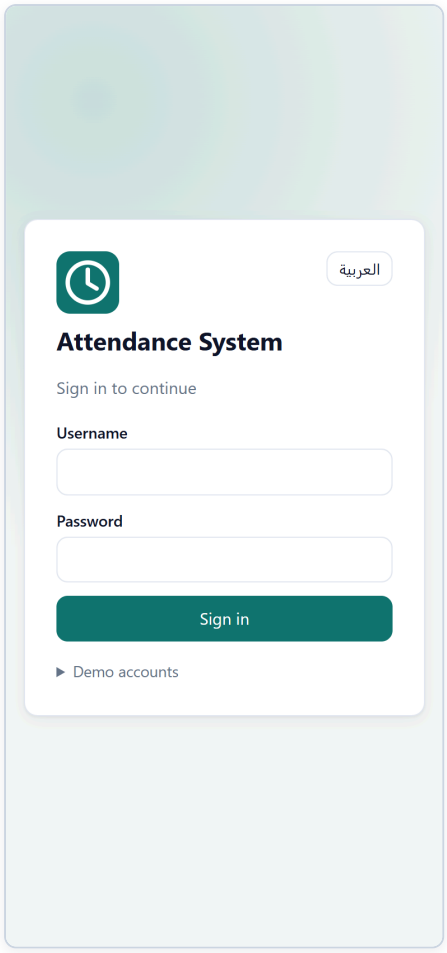

Figure 1: Sign-in screen

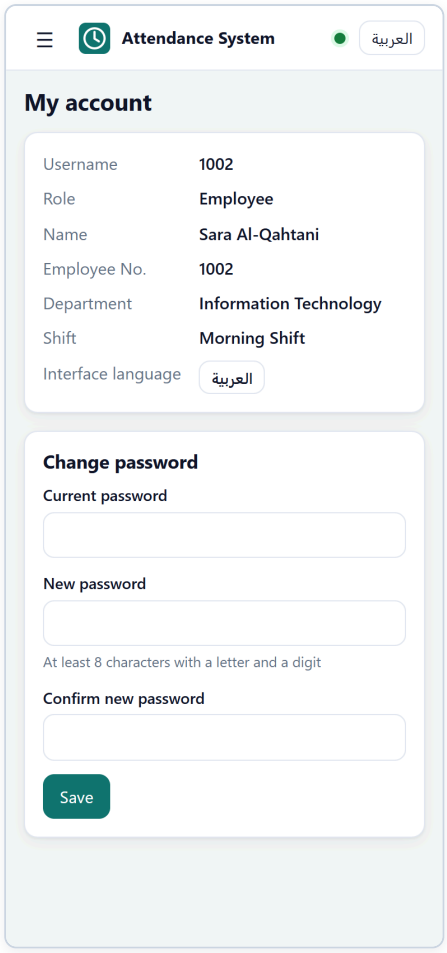

Figure 2: My account

> **Account lock**
> After 5 wrong passwords the account is locked for 10 minutes. If you forget your password, ask HR to reset it.

Switch language

Use the language button (العربية / English) at the top of the screen. The layout switches between right-to-left Arabic and left-to-right English.

My account

Open My account to:

- **Change your password**: enter the current password, then the new one twice. It needs at least 8 characters with a letter and a number.
- **Choose the interface language**. It is saved with your account.

Use Sign out on shared computers.

Add the app to your phone's home screen

- **Android (Chrome)**: menu ⋮ → Install app / Add to Home screen.
- **iPhone (Safari)**: Share ↑ → Add to Home Screen.

3. Employees: checking in and out

The Check in / out screen

After signing in on your phone you see:

- Your name, employee number and department, plus the current time and date.
- **Your shift** with its times, and your **Workplace** (every site you may check in at).
- The large buttons **Check in** and **Check out**.
- **Location status** with a map, and **Today's activity**.

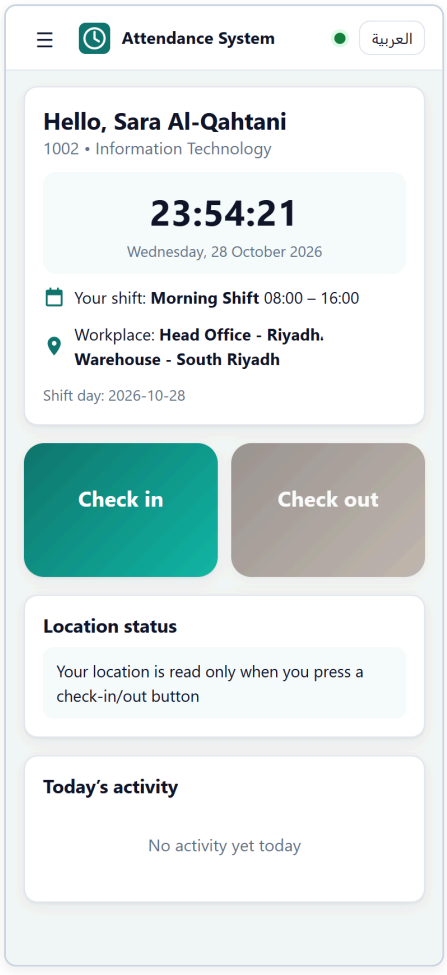

Figure 3: Before checking in

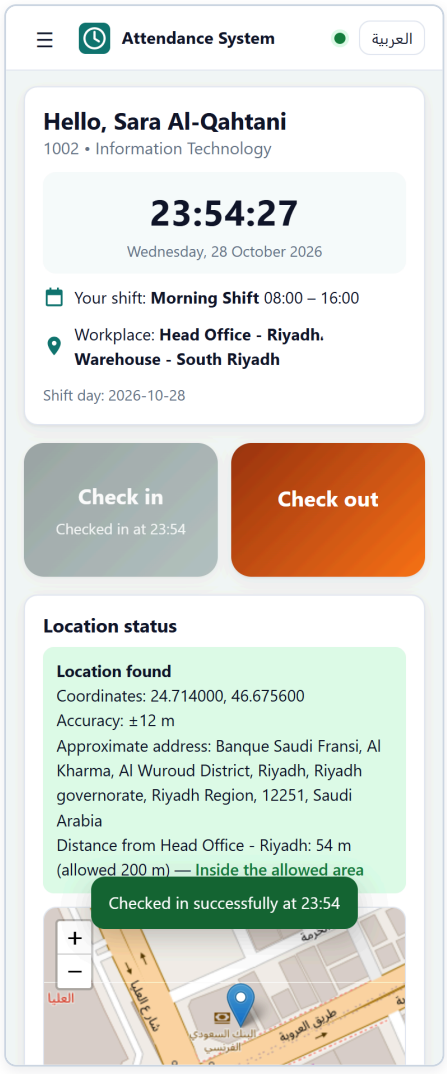

Figure 4: After a successful check-in

Check in

1. When you arrive at work, open the app and tap **Check in**.
2. The app reads your location once. Allow location access the first time you are asked.
3. You see the accuracy, your distance from the nearest workplace and a map.
4. A message confirms: *Checked in successfully at 08:02*. The button shows the time.

Check out

Before leaving, tap **Check out**. It becomes active after you have checked in. When both are done you see *You have completed check-in and check-out for this day*.

> **Your privacy**
> Your location is read **only** at the moment you press Check in or Check out. The app never tracks you at any other time.

Several workplaces

If you work at more than one branch, every site appears under **Workplace**. You can check in at any of them; the distance shown is to the nearest one.

Night shifts

For a shift such as 22:00 → 06:00, the check-in and the check-out the next morning both belong to the day the shift **started**.

No internet connection

1. If you are offline, you can still tap the button. The punch is saved on your phone with the real time and marked `Waiting to sync`.
2. When the connection returns, it is sent automatically. You can also tap **Sync now**.
3. Records then show both the *Actual time* and the *Synced at* time.

> **Limit**
> Offline punches older than 72 hours (set by the admin) are rejected. The result is shown under **Sync results**.

Messages you may see

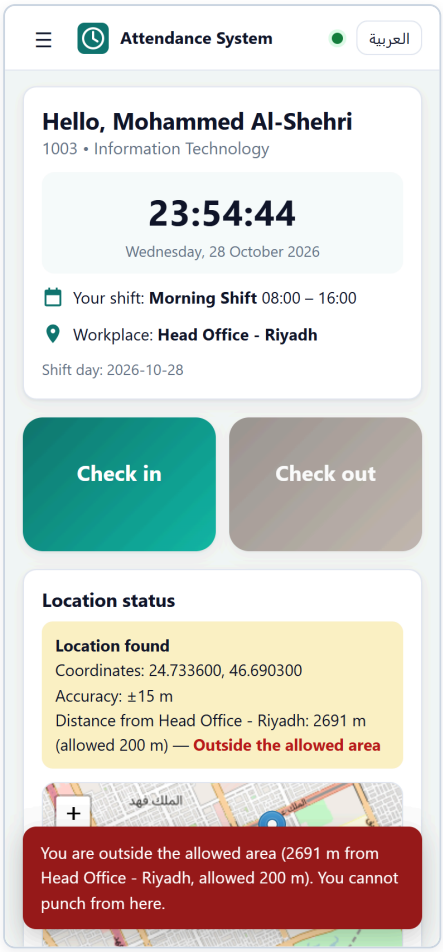

Figure 5: Check-in refused outside the allowed area

Message	What to do
You are outside the allowed area (... m from ...)	Move inside your workplace and try again. If you are inside and still rejected, tell HR.
Location accuracy is poor	Step outside or near a window, wait a few seconds and try again.
Location permission was denied	Allow location for the site in your browser or phone settings, then try again.
Location is unavailable / timed out	Turn on GPS (Location) on the phone and retry in an open area.
Location requires a secure (HTTPS) connection	You are using a wrong address. Use the address HR gave you.
No shift is assigned to you	Contact HR.
Today is not one of your scheduled work days	You can still punch; it counts as work on a day off.
You have a Leave / Official mission recorded today	For information. HR registered leave or a mission for you.
Already checked in / already checked out	The punch was already recorded. You cannot record it twice.

My record

My record shows your last 30 days: date, status, check-in and check-out times, late minutes, worked time and a Map button for each day's locations. Chapter 7 explains the statuses.

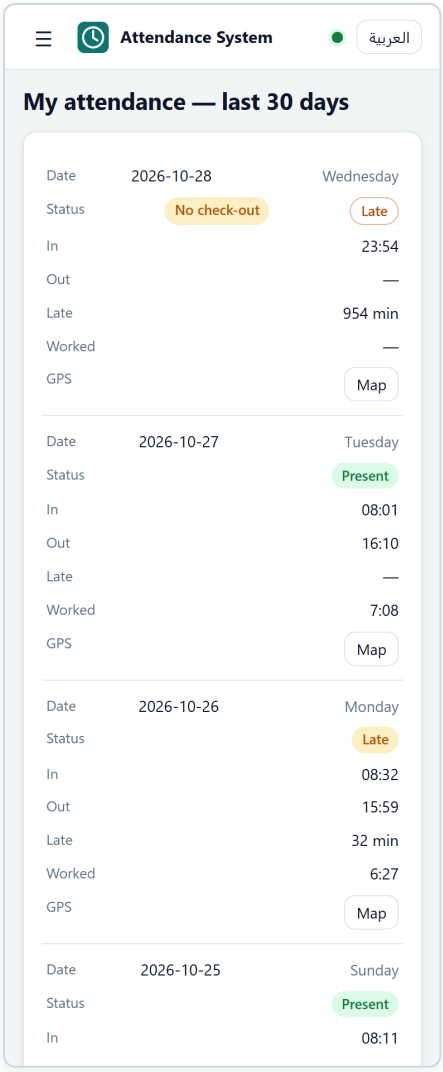

Figure 6: My record

4. Line managers

As a line manager you see only your team: the employees whose *Direct manager* is you.

Dashboard

- **Today's attendance**: counts of scheduled, present, late, absent, on leave/mission, at work, not arrived yet and no check-out.
- **Alerts**: absent today, late today, did not check out (today and yesterday) and rejected punch attempts in the last 24 hours.
- **Attendance by department** and the **attendance rate for the last 7 days**.

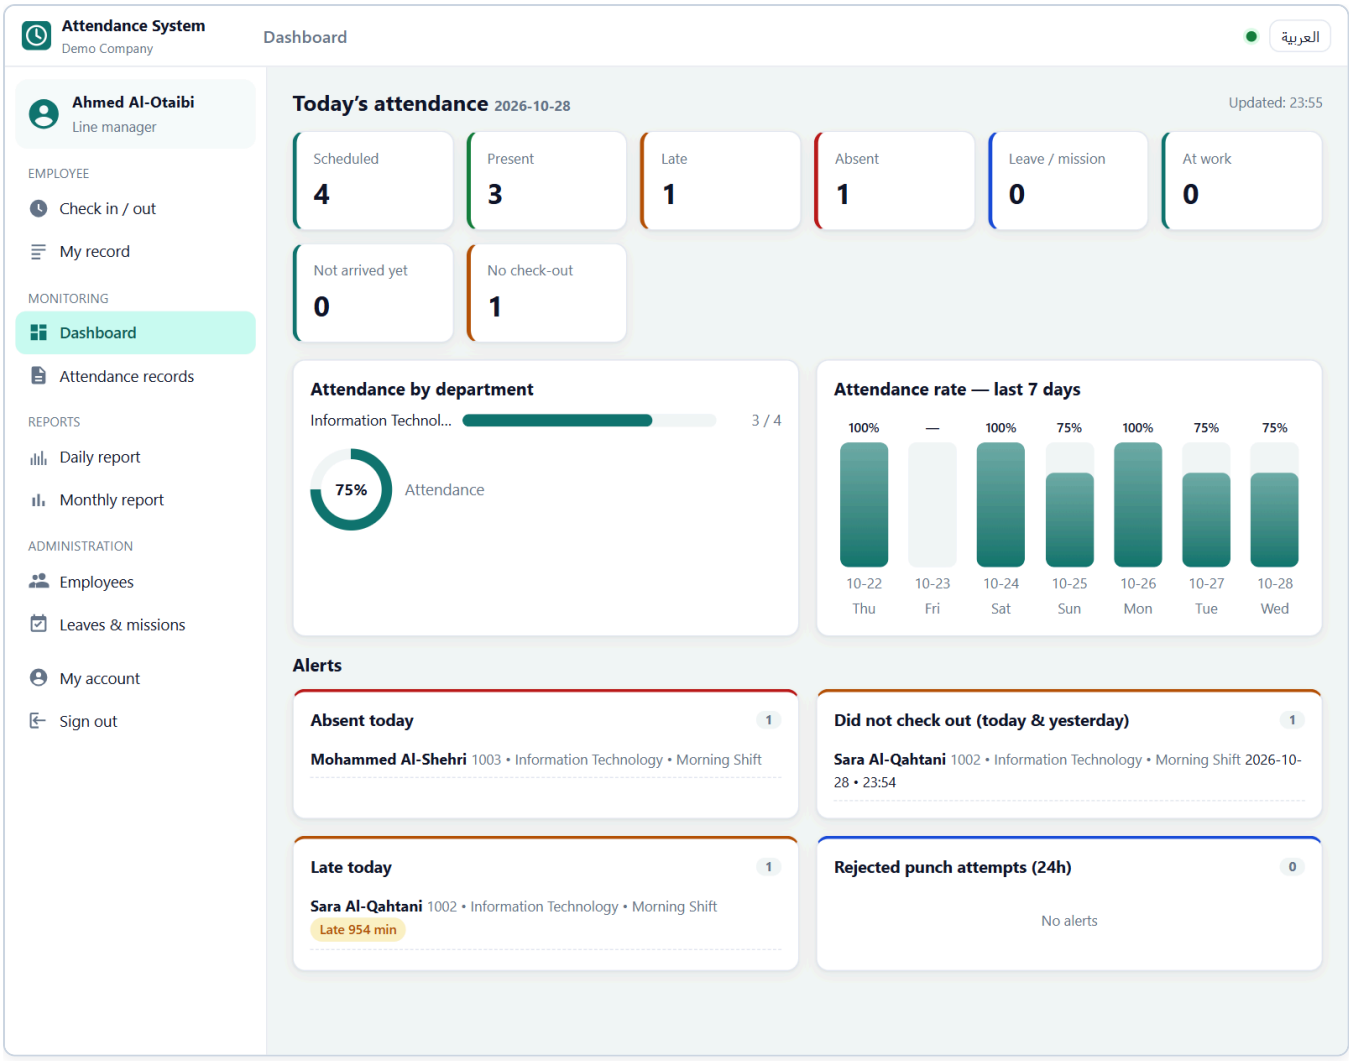

Figure 7: Dashboard (line manager, team only)

Reports

Daily report and Monthly report work as described in chapter 5, limited to your team. Use GPS / Map to see where a punch was made.

Leaves and missions

Open Leaves & missions → Add to record a *Leave*, *Official mission* or *Exemption* for a team member (see chapter 5).

5. HR

Employees

Employees → Add. Fields marked * are required.

Field	Meaning
Employee No. *	Unique number. Often also used as the employee's username.

Field	Meaning
Name (Arabic) * / Name (English) *	Shown in Arabic or English depending on the interface language.
Department, Job title, Mobile, Email	For reports and filtering.
Status *	*Active*, *Inactive* or *Suspended*. Inactive employees are left out of reports.
Shift	Defines the expected times. An employee without a shift cannot punch.
Work location	The main site.
Additional work locations	Tick other sites where the employee may also check in.
Direct manager	The line manager who will see this employee.
Must check in from inside the geofence	If ticked, punches outside all of the employee's sites, or with poor GPS accuracy, are rejected. Untick for drivers or field staff.
Exempt from late / early-leave rules	The employee's punches are recorded but never marked late or early.

Search with the search box, filter by department, shift and status, and use **Edit** / **Delete**. An employee with attendance records cannot be deleted; set the status to *Inactive* instead.

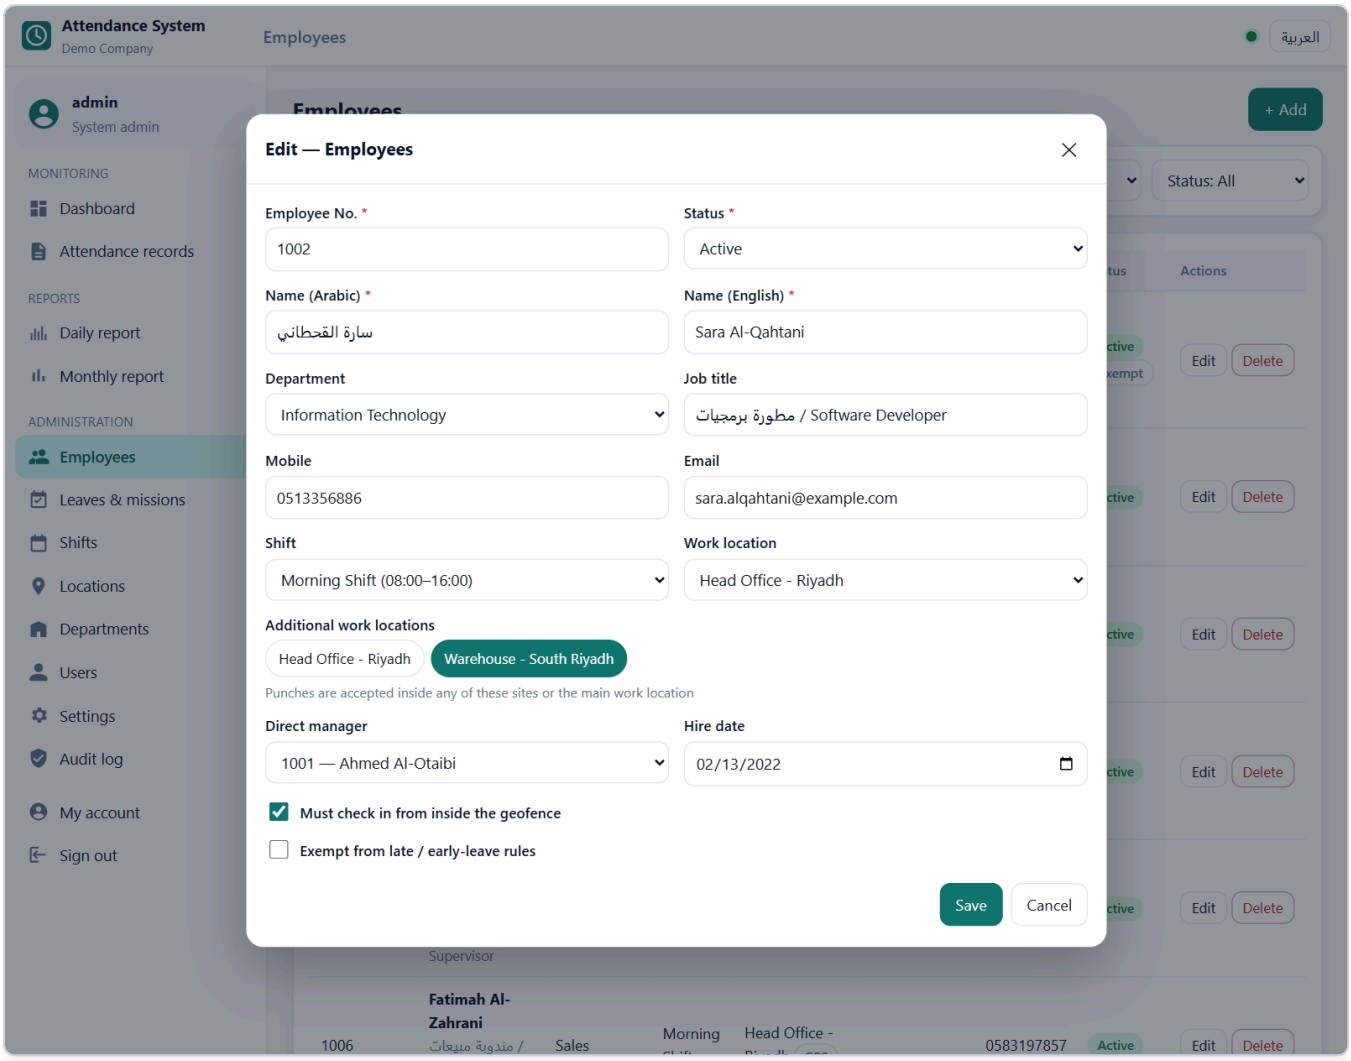

Figure 8: Employee form with additional work locations

Shifts

Field	Meaning
Start time / End time	If the end time is earlier than the start time, it is an **overnight shift**.
Work days	Days the employee is scheduled. Punches on other days count as work on a day off.
Check-in grace (min)	Arriving within this time after the start is not counted as late.
Check-out grace (min)	Leaving within this time before the end is not counted as early leave.
Break (min)	Subtracted from worked time.
Overtime counts after (min)	Work after the shift end beyond this is counted as overtime.

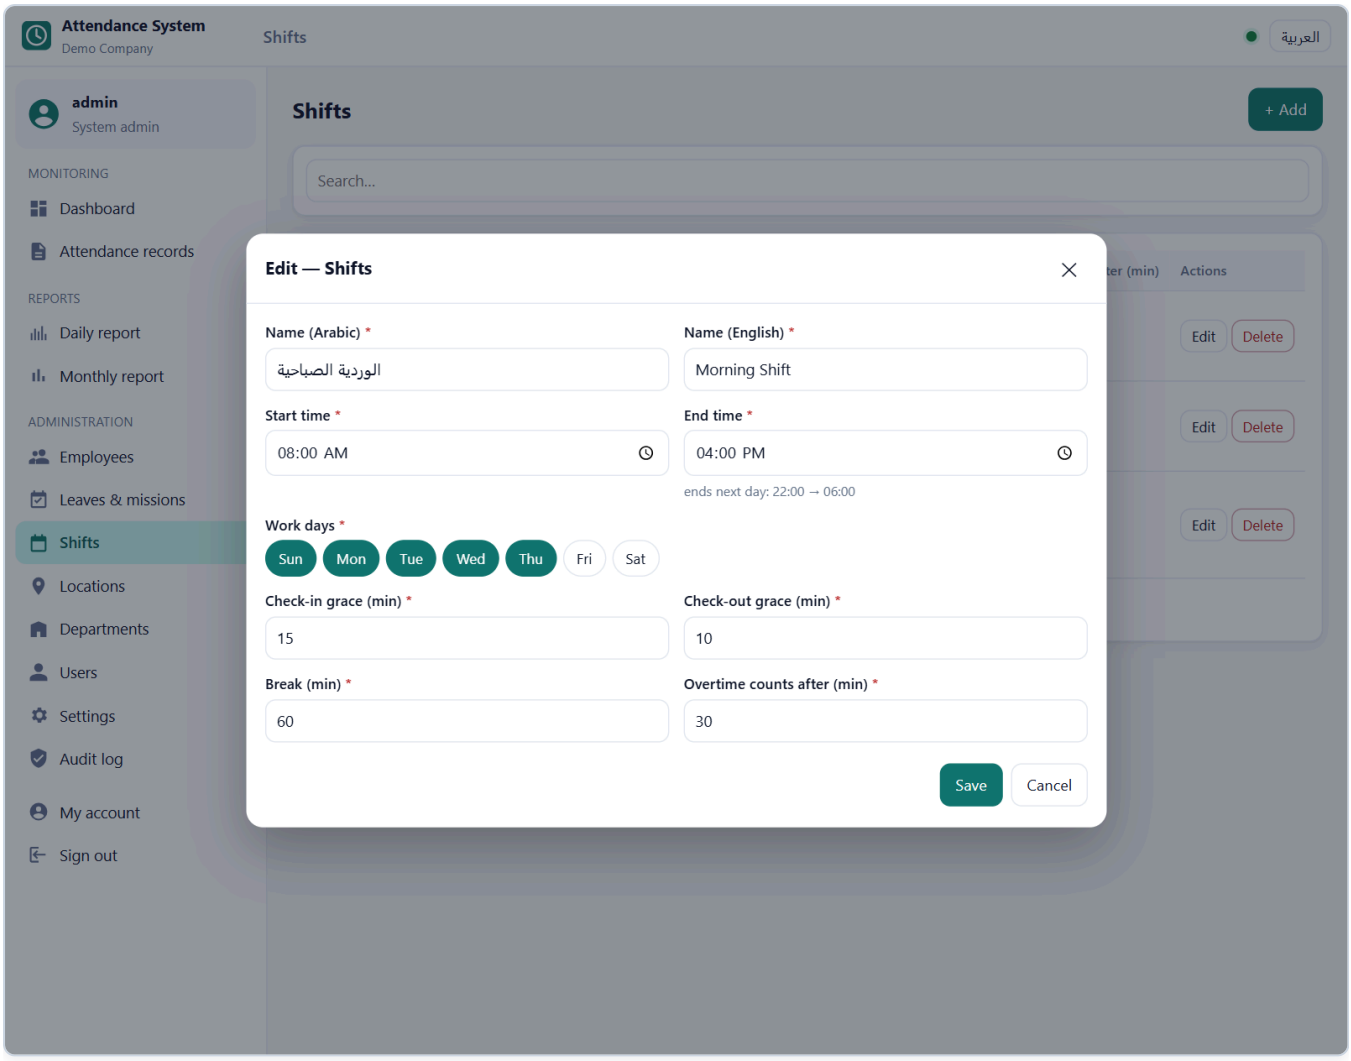

Figure 9: Shift form

Locations

Locations → Add: enter the names, click the map (or drag the pin) to set the position, and set the Allowed radius (m). The circle on the map shows the allowed area. Use Map in the list to check a site.

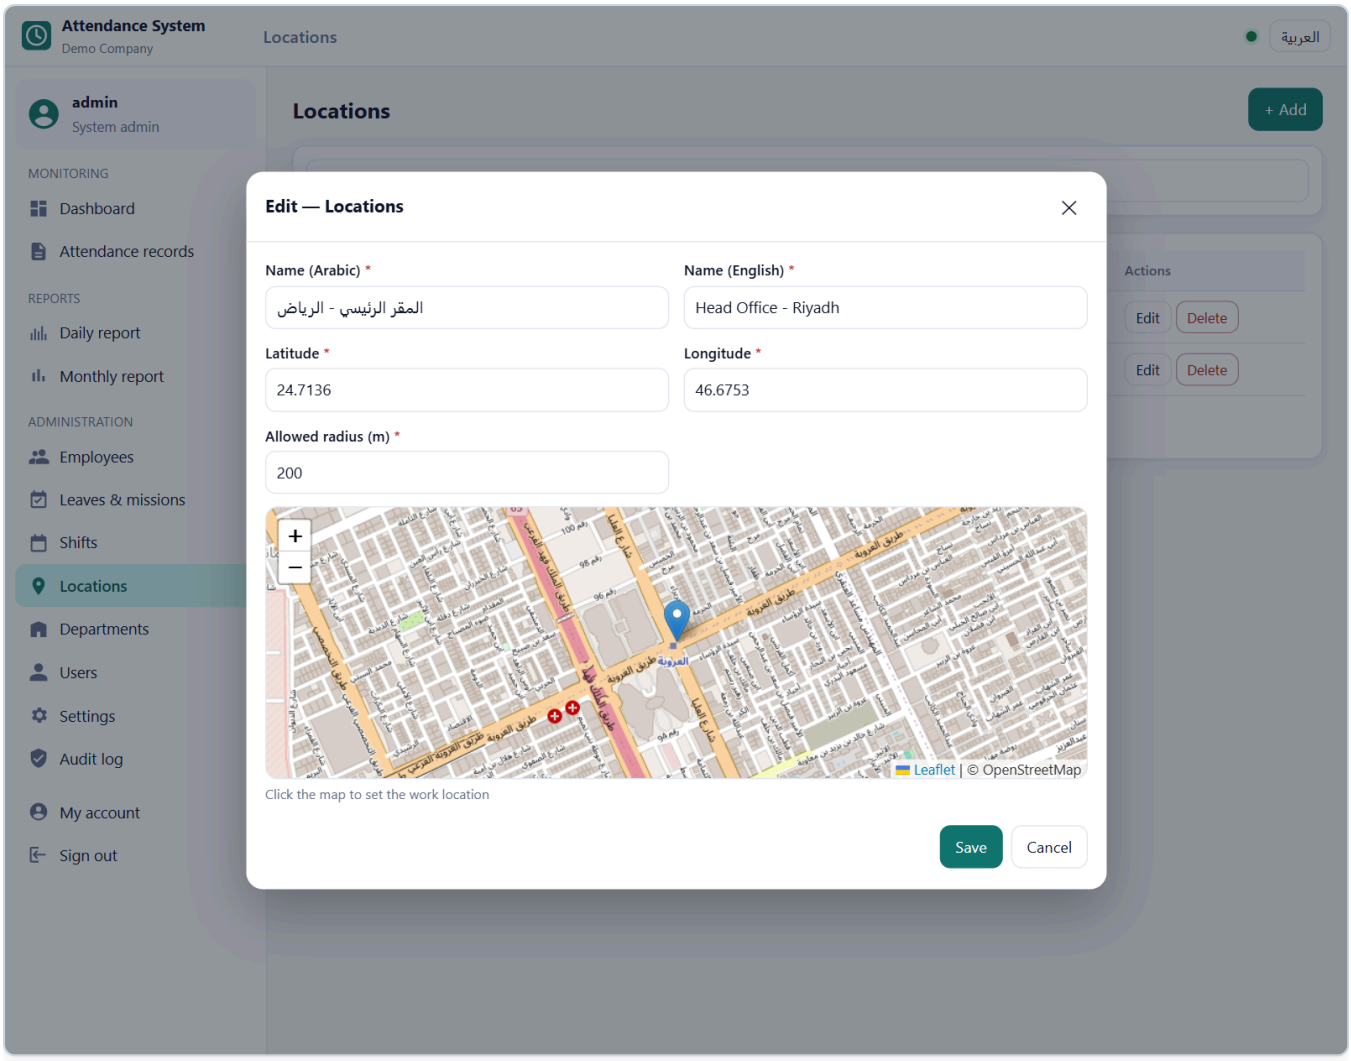

Figure 10: Location form with map and radius

Departments

Add, rename or delete departments. A department in use cannot be deleted.

Leaves & missions

Type	Effect on reports
Leave	The days show as **Leave**, not absence.
Official mission	The days show as **Official mission**.
Exemption	The days show as **Exempt**; no late or absence is counted.

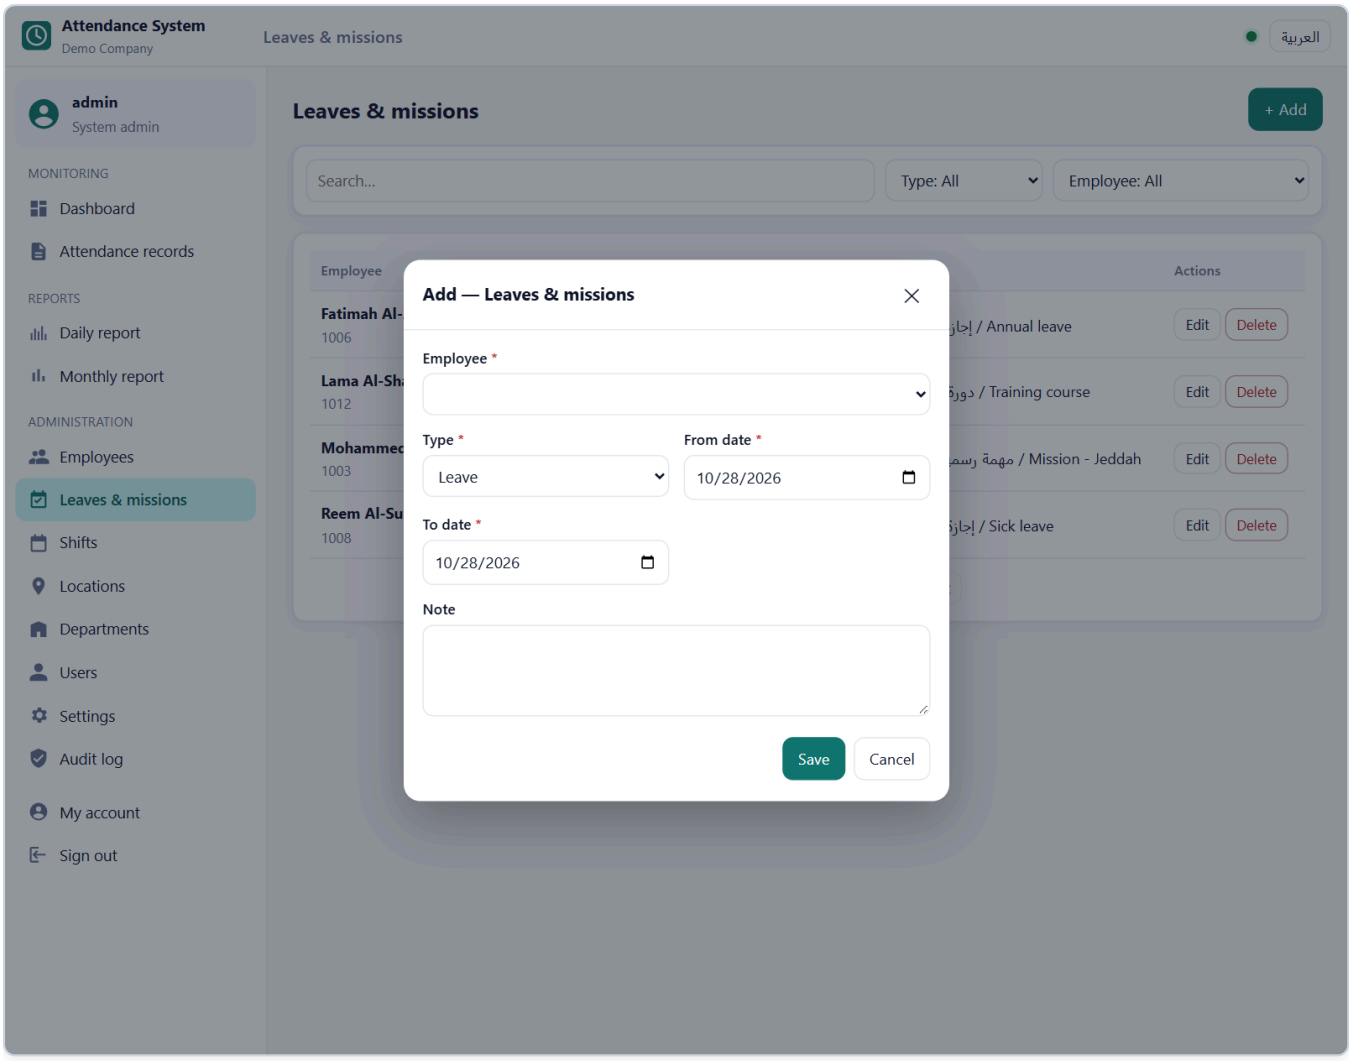

Figure 11: Adding a leave or mission

Attendance records

Attendance records lists every punch with its time, source (*Mobile*, *Manual*, *Edited*), offline flag, accuracy, distance and map.

- Add manual record: for a forgotten punch. Choose the employee, type, shift date and time (company time).
- Edit: change a punch's time.
- Delete: remove a wrong punch.

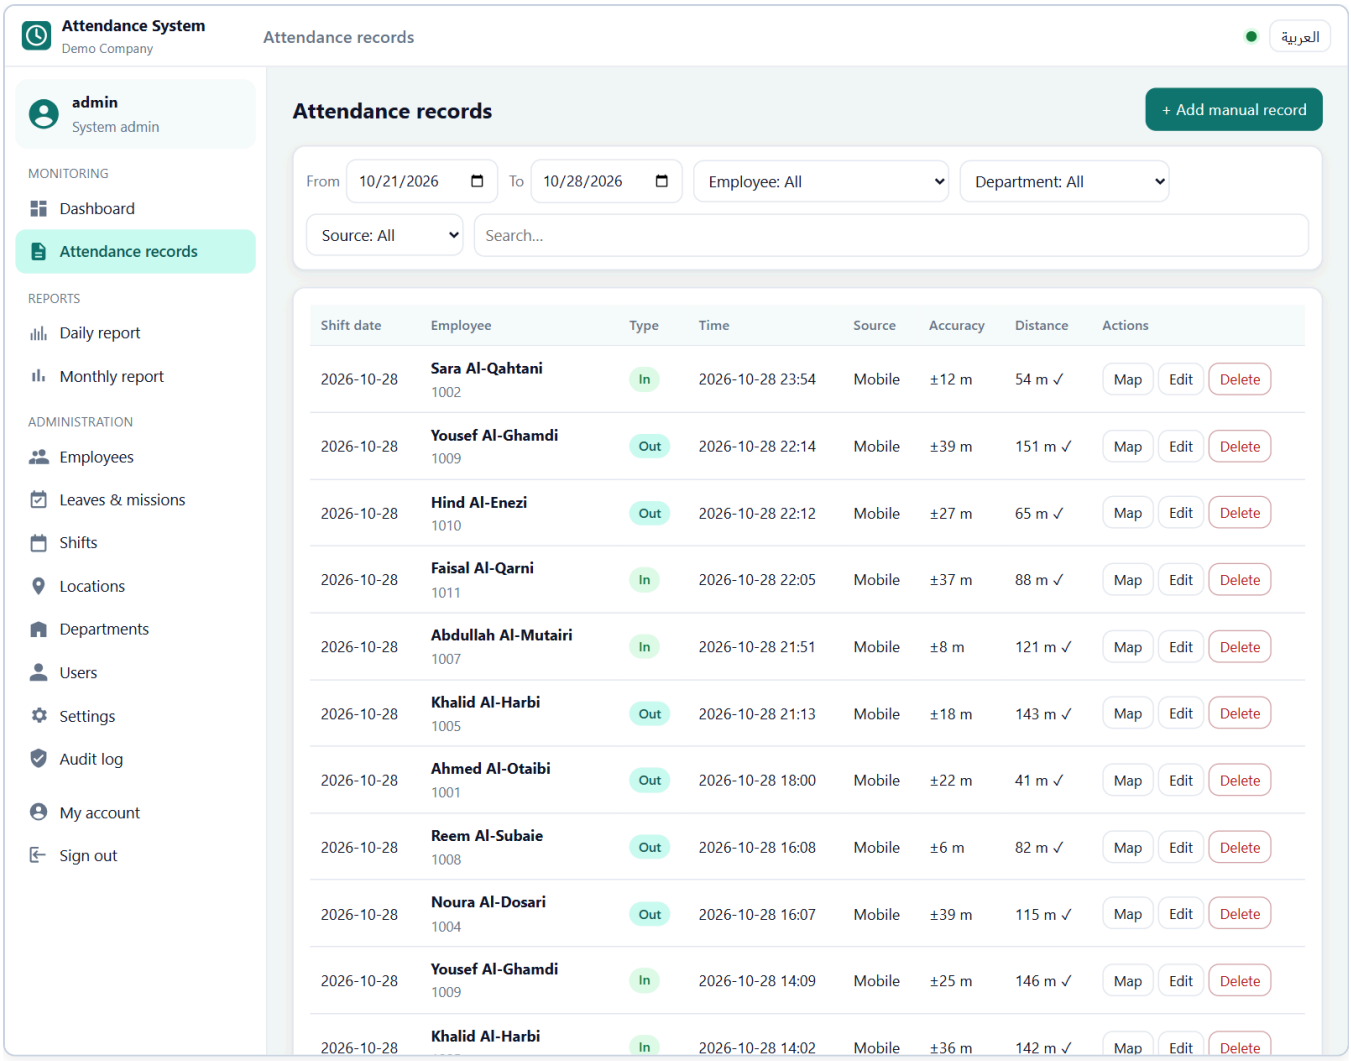

Figure 12: Attendance records

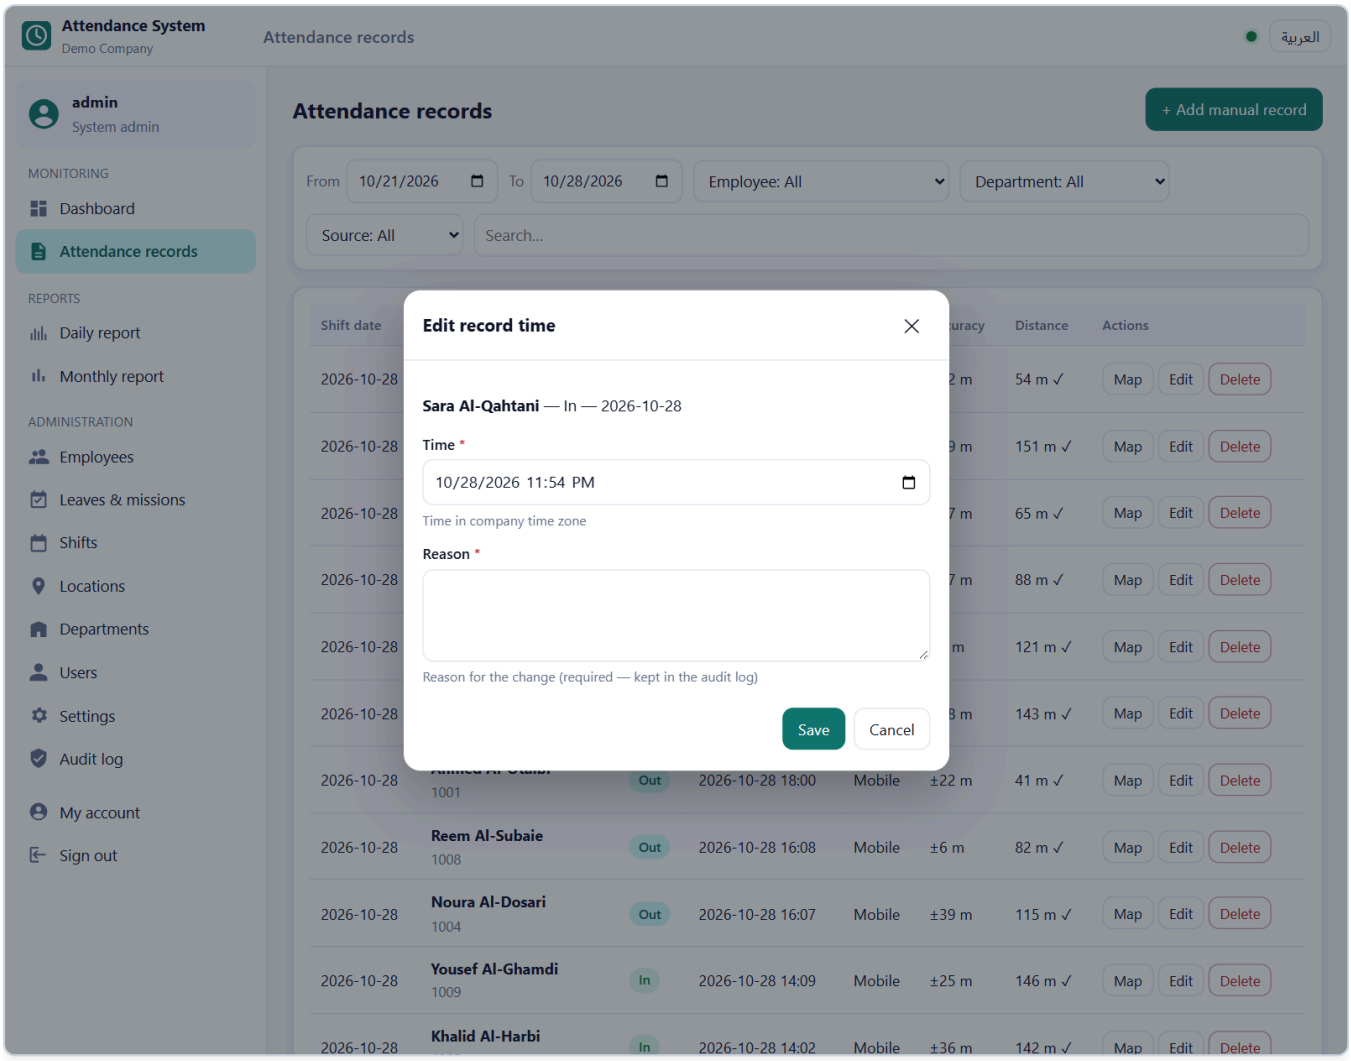

Figure 13: Editing a punch: the reason is required

> **A reason is required**
> Every add, edit or delete needs a reason. It is stored in the audit log with the old and new values, your username, the time and the IP address.

Daily report

Choose a date (and optionally a department or shift) and tap **Show**. For each shift you see scheduled employees, actual in/out times, status, late, early leave, worked time and overtime, a **GPS** button, and a separate **Absentees** list.

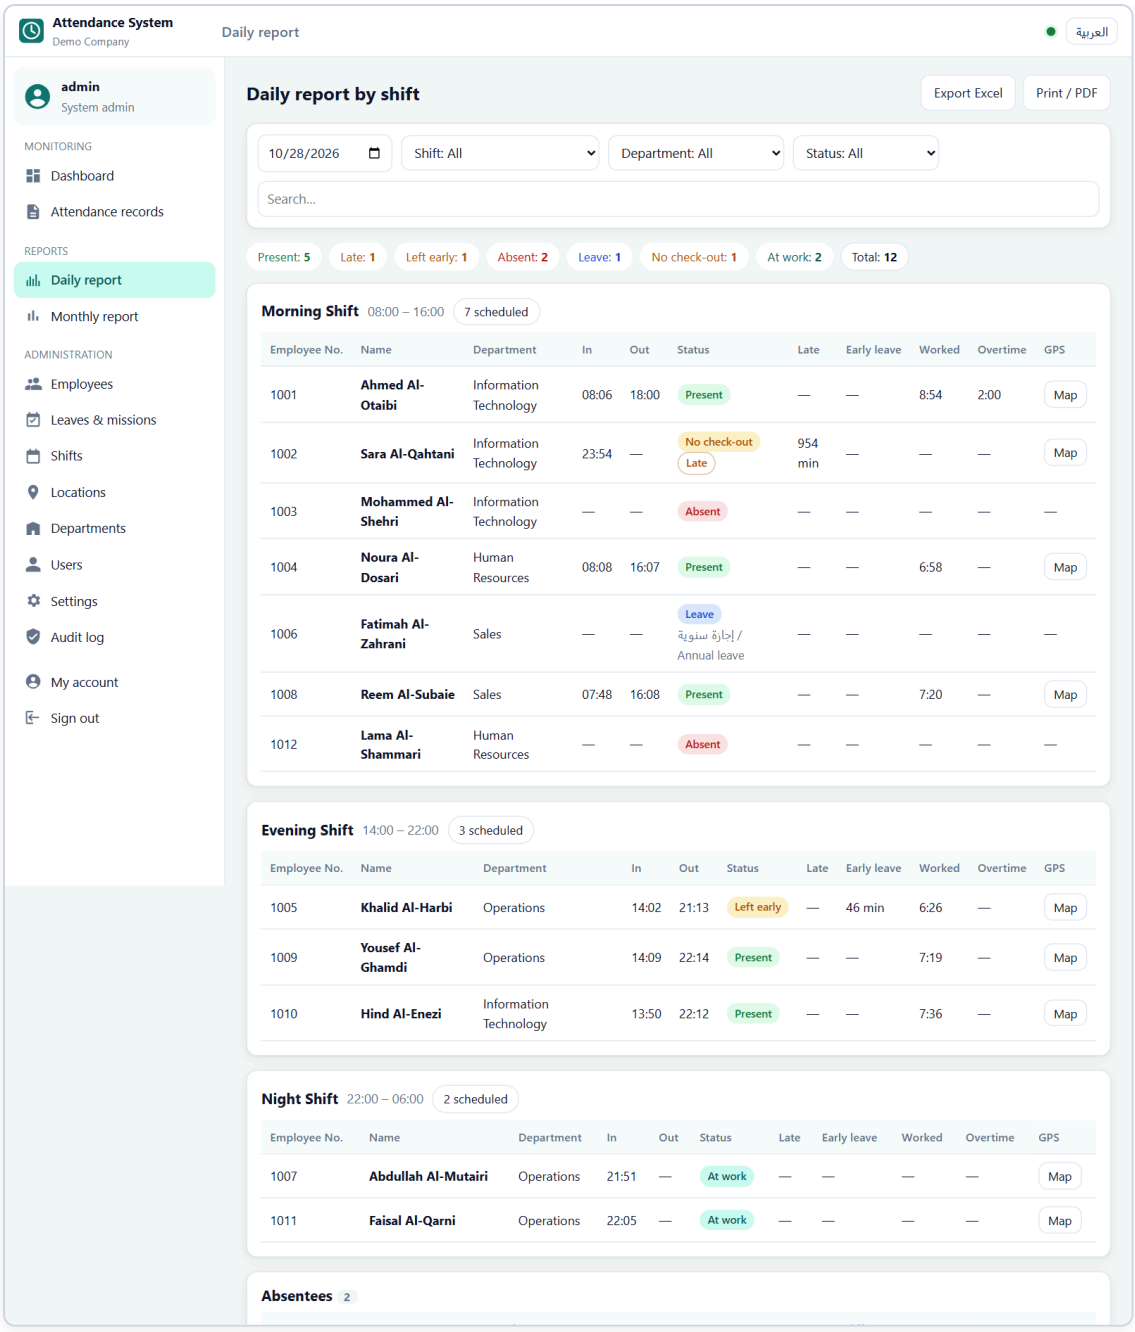

Figure 14: Daily report by shift

Monthly report

Choose a period and filters (department, shift, employee). You get a summary per employee (scheduled, present, absent, late days and minutes, early leave, leave, mission, no check-out, work and overtime hours, attendance rate), totals by department and by shift, and a chart.

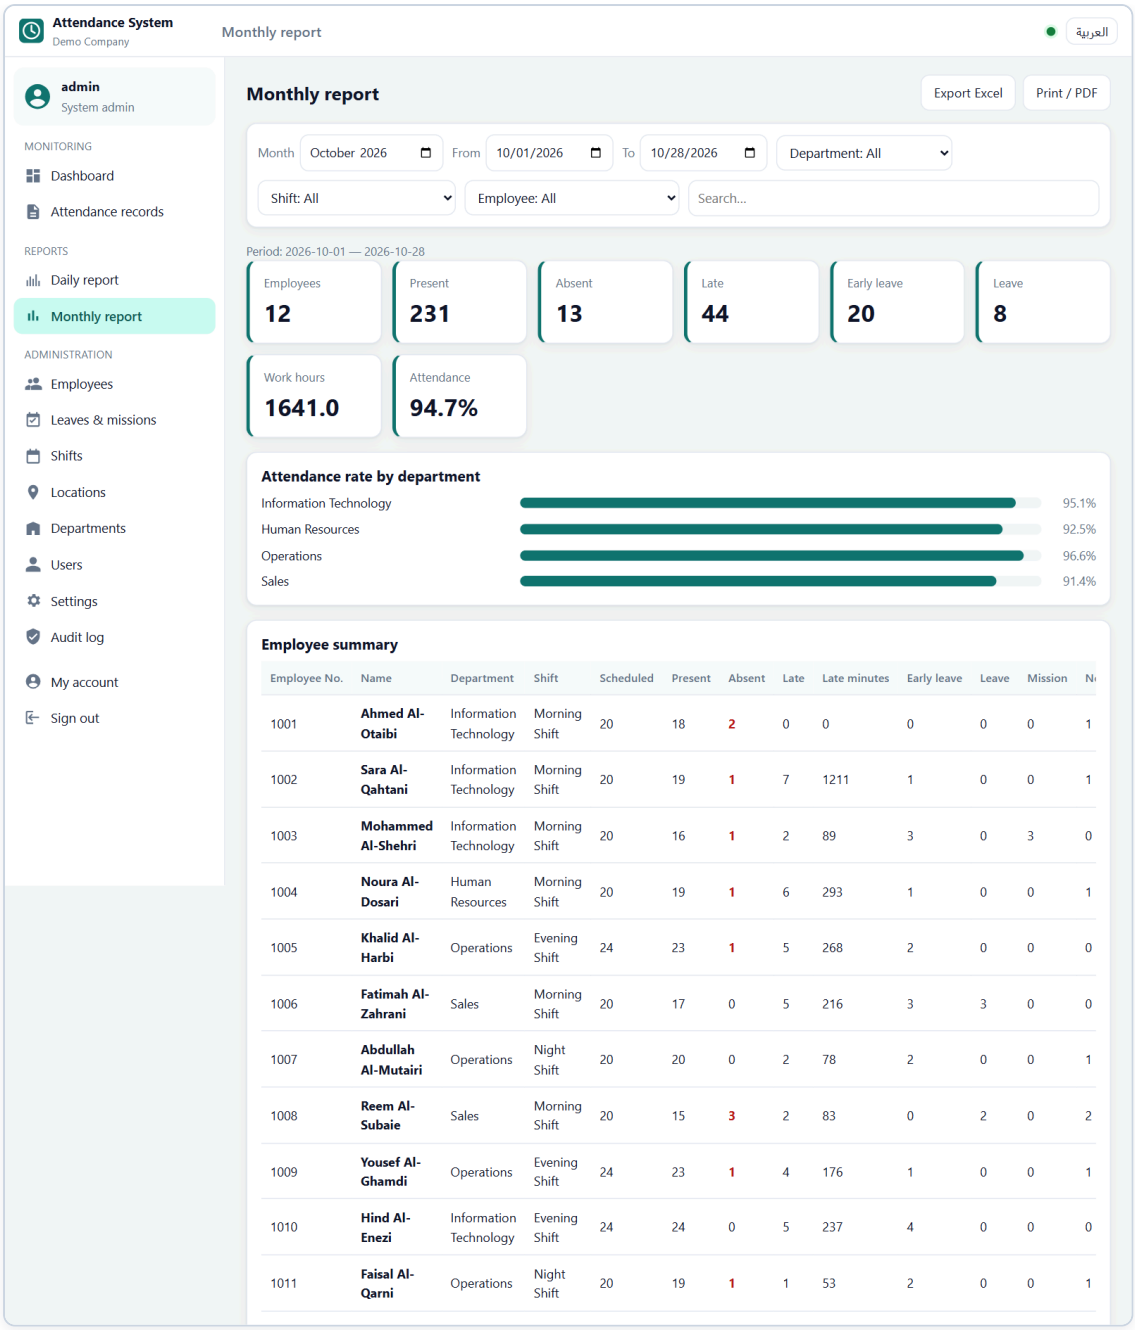

Figure 15: Monthly report

Export and print

- Export Excel downloads an `.xlsx` file in the current interface language.
- Print / PDF opens printing in A4 landscape. Choose *Save as PDF* as the printer to get a PDF file.

Users

1. Users → Add: enter a username (3–50 letters, numbers or `_ . @ -`), a password and the role.
2. For the role *Employee*, choose the linked employee (required). Link managers to their own employee record too, so their team is identified.
3. To reset a forgotten password, edit the user and type a new password; this also unlocks a locked account. Leave it empty to keep the current one.

4 To block access, untick **Account active**.

HR can create *Line manager* and *Employee* accounts. Only the system admin can create *HR* and *System admin* accounts.

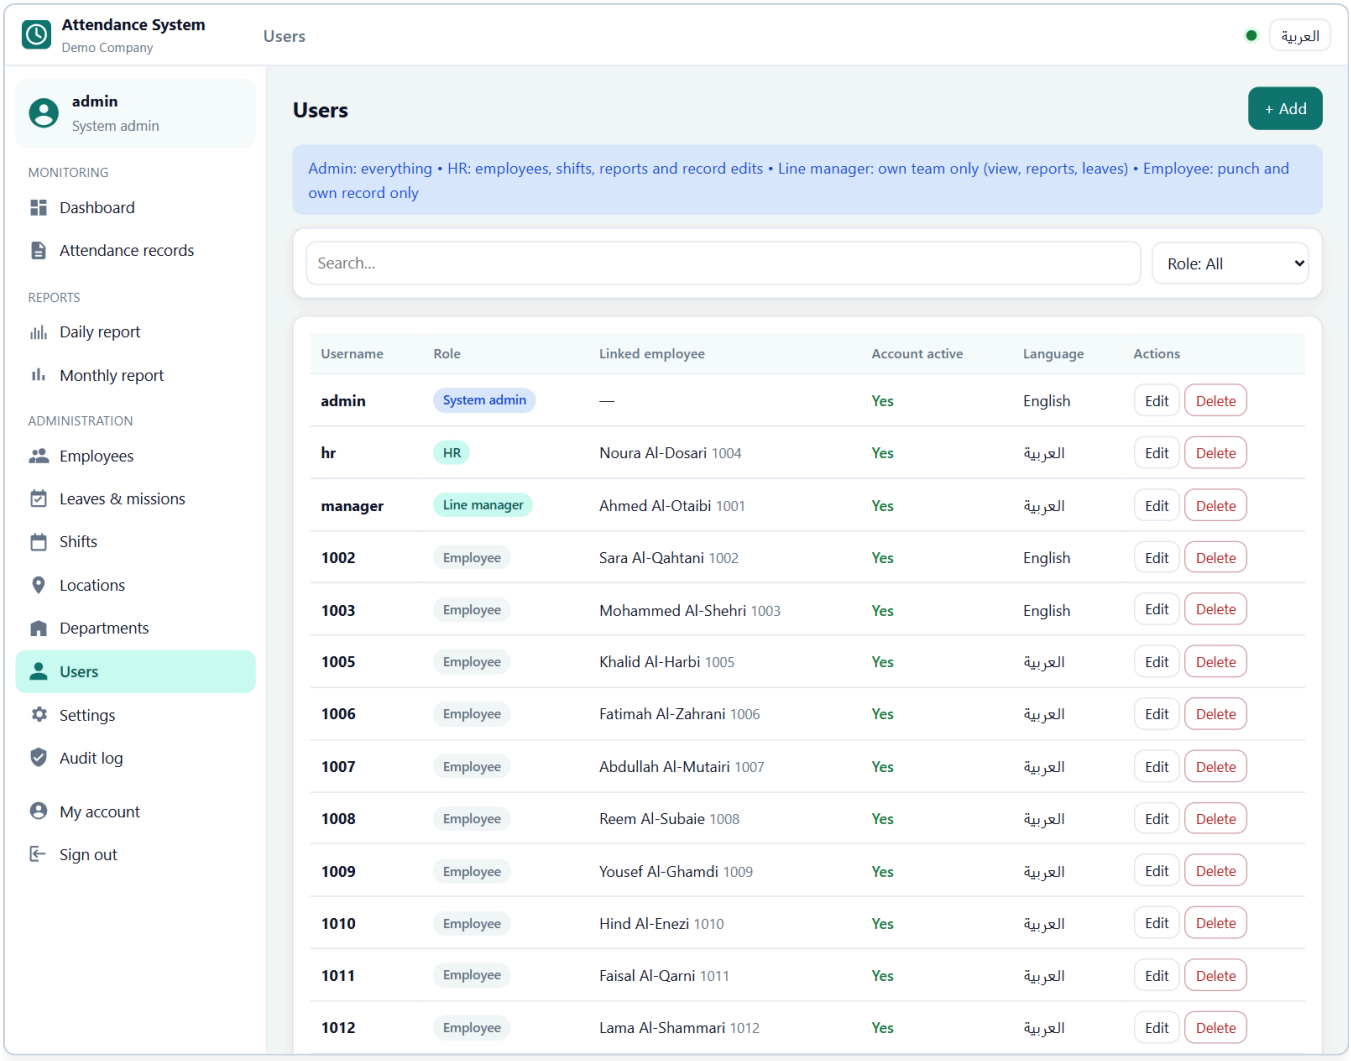

Figure 16: Users and roles

6. System admin

Settings

Setting	Meaning
Company name (Arabic / English)	Shown in the app and on reports.
UTC offset (minutes)	The company time zone. 180 = Riyadh (UTC+3). All times are calculated in company time, not phone time.
Count lateness / early leave / overtime	Turn each calculation on or off.

Setting	Meaning
Count as absent if late more than (min)	A very late arrival counts as absence. 0 = off.
Require location for every punch	Even employees without a geofence must share their location.
Maximum location accuracy (m)	Punches with worse GPS accuracy are rejected for geofenced employees. Default 150.
Maximum age of offline punches (hours)	Older offline punches are rejected. Default 72.
Flag “no check-out” after shift end by (min)	When to treat a missing check-out as an alert. Default 120.
Number of backups to keep	Daily automatic backups kept. Default 14.

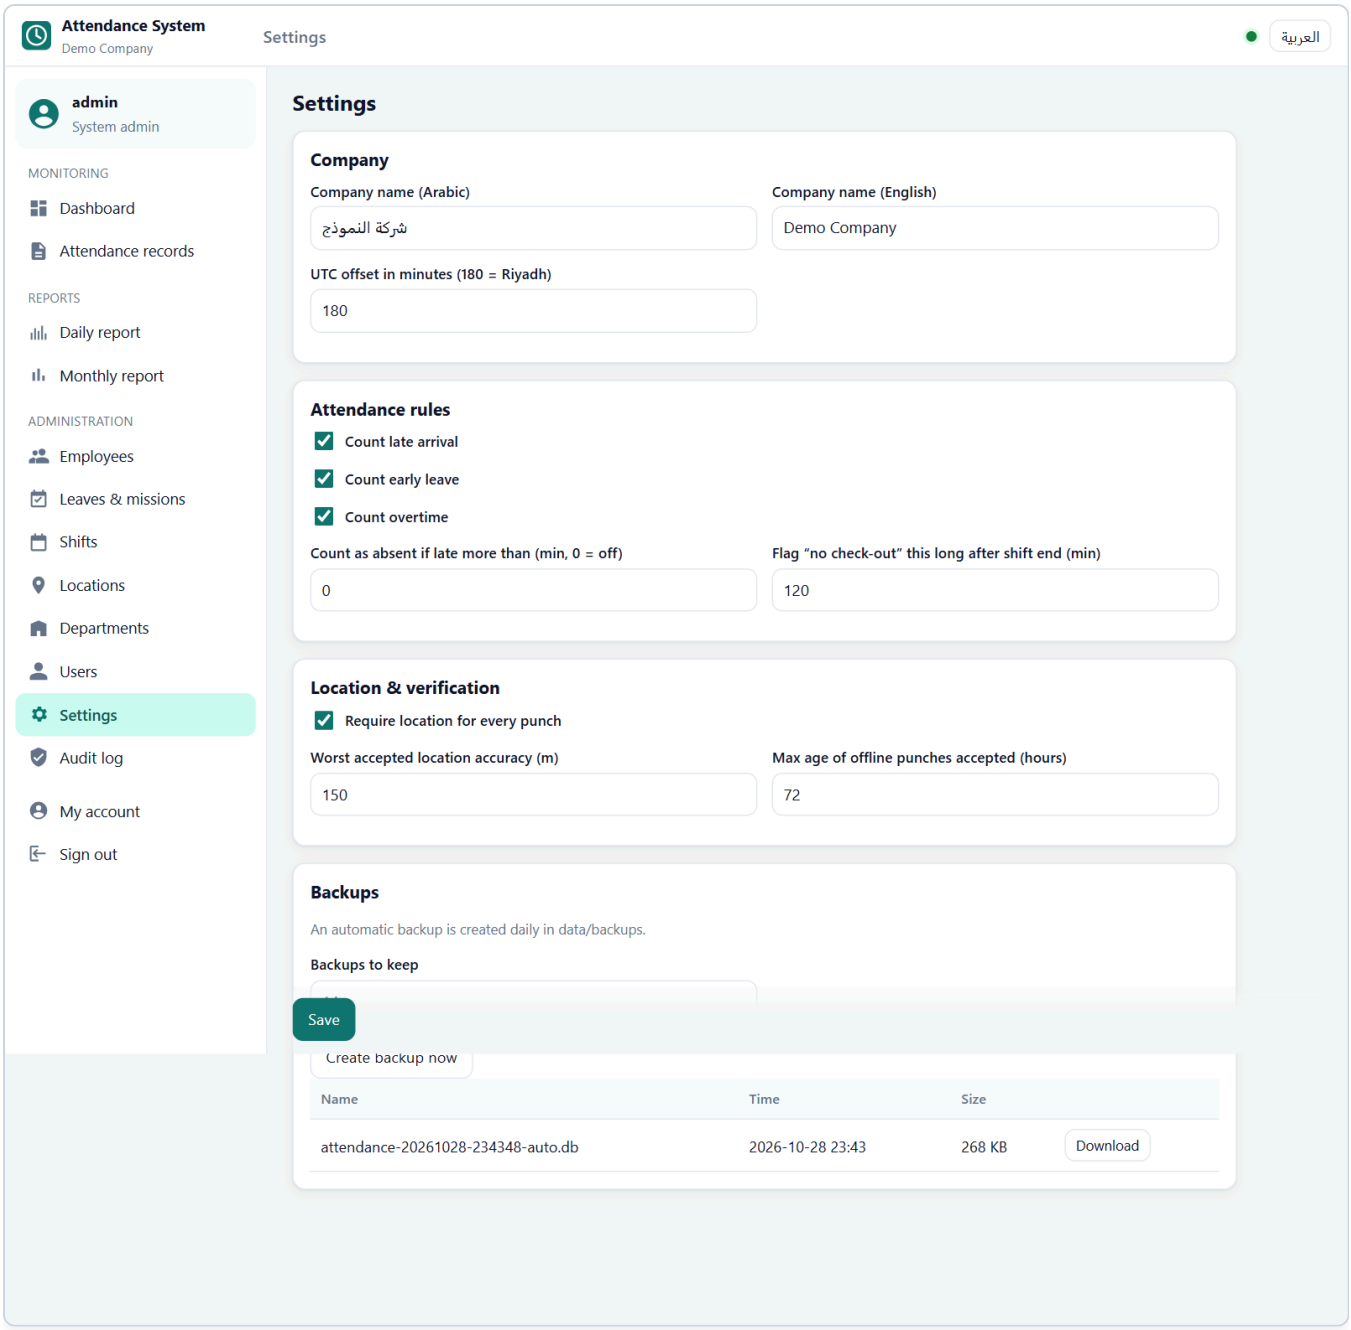

Figure 17: Settings

Backups

Under Settings → Backup, tap Create a backup now before major changes, and Download a copy to keep outside the server. The Setup Guide explains how to restore.

Audit log

Audit log records sign-ins, failed sign-ins, every create, edit and delete (with old and new values and the reason), rejected punch attempts, exports and backups, each with the user, time and IP address. HR can view it too.

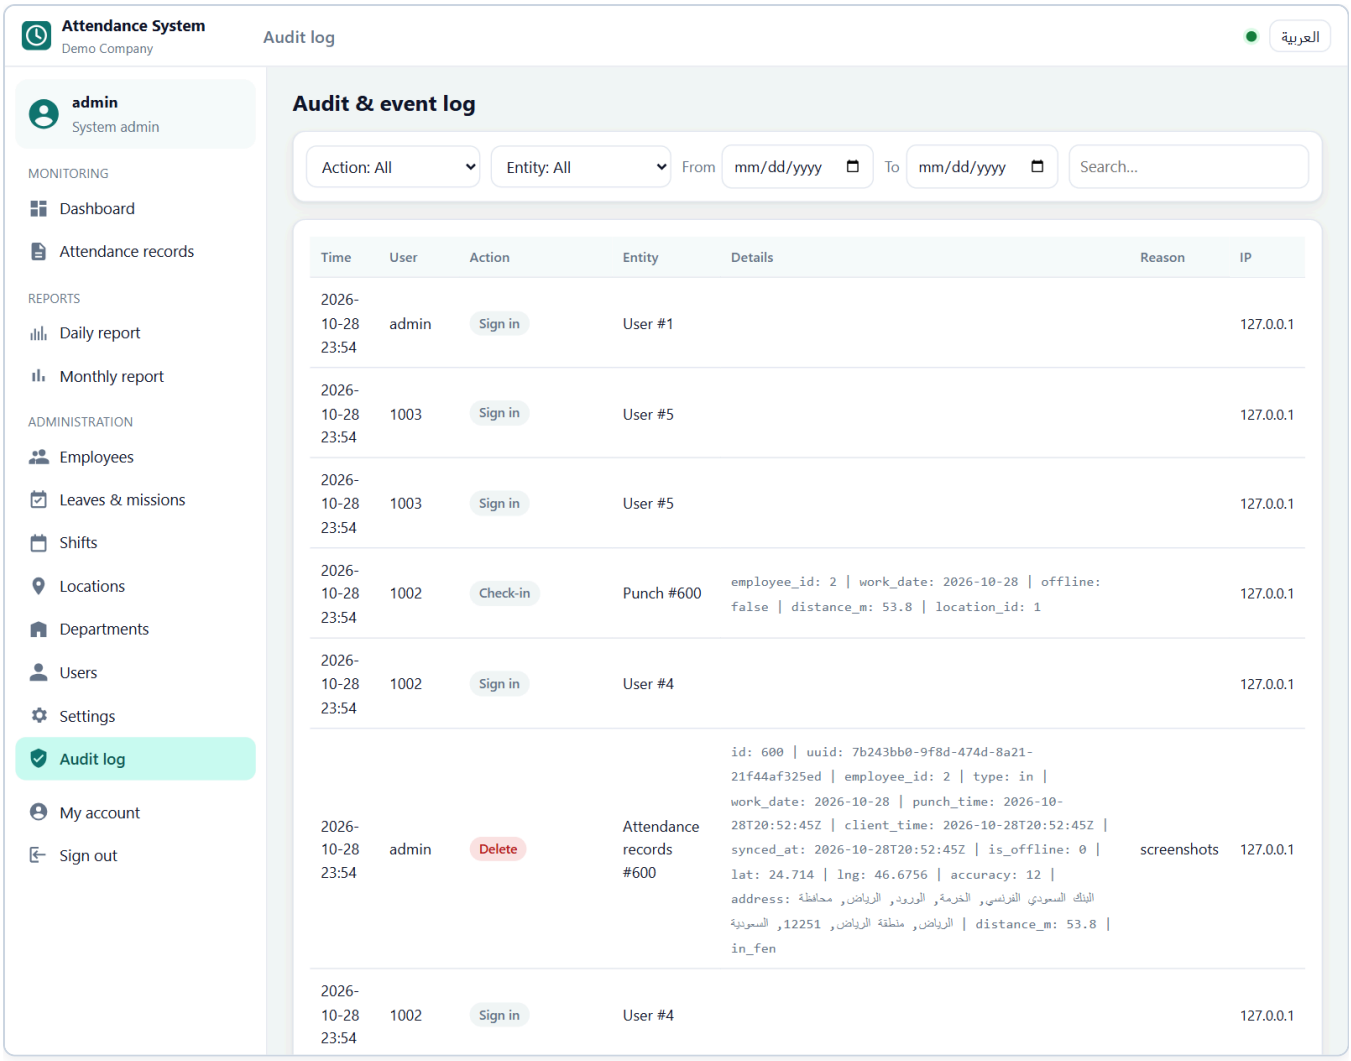

Figure 18: Audit log

7. Attendance statuses

Status	Meaning
Present	Checked in on time.
Late	Checked in after the shift start plus the grace period.
Left early	Checked out before the shift end minus the grace period.
Absent	Scheduled but no check-in, with no leave or mission (or late beyond the absence limit).
No check-out	Checked in but did not check out by the alert time.
Leave / Official mission	Registered by HR or the manager.
Exempt	Exemption registered, or the employee is exempt from the rules.
At work	Today: checked in and has not checked out yet.

Status	Meaning
Not arrived yet	Today: the shift has not started or the employee is still within the grace period.
Worked on day off	Punched on a day that is not a scheduled work day; all of it counts as overtime.

8. Frequently asked questions

Does the app track my location all day?

No. Location is read only at the moment you press Check in or Check out.

I forgot to check out. What now?

Tell your manager or HR. HR can add the missing punch under Attendance records, with a reason.

Can I check in from another branch?

Yes, if HR has added that branch to your Additional work locations.

My phone shows a different time than the record.

The system always uses the company time zone set by the admin, not the phone's clock.

Can I check in for a colleague?

No. Each account is personal, and every punch is recorded with location, device and time in the audit log.

I changed phones.

Open the same address on the new phone, sign in and add it to the home screen. Nothing else is needed.
